Stay on top of important dates and tasks – at a glance

Running any yachting operation, the 'to do' list is long, and it's easy to get caught out.

But with Sealogical's automated Notifications feature, missed dates and deadlines can be a thing of the past. Now, at a glance, you can keep right on top of things – because you'll be reminded of what you need to do, and when, every step of the way.

Fully integrated, totally reassuring

Sealogical's Notifications system is fully integrated. This means whatever part of the site you're using, clear alerts about required action are the first thing you see. And it flags up all new messages and your recent activity in that section too.
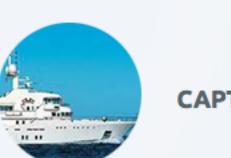

So if a survey is imminent, or a safety certificate needs renewing, you'll always know.

What our clients think of us

"Sealogical is a huge breakthrough! From keeping up with your ships ISM/ISPS requirements, dealing with your everyday ships business or making a refit run smoothly and efficiently, Sealogical is a must in today's world of yachting!"

CAPTAIN CHRIS GARTNER
Motor Yacht Senses

"Y.CO use a bespoke version of Sealogical.com for our whole management fleet. Sealogical platform is simply the best yacht management solution we've seen. The simple 'hours of rest' feature is great for our crew, and Captains really value the safety management and financial reporting tools."

YVES DAMETTE
Director Yacht Management, Y.CO
